The screenshot shows the homepage of the MedAssist AI website. At the top, there is a navigation bar with the logo "MedAssist AI" followed by links for Home, Health Information, Wellness Tips, First Aid, and Explore. Below the navigation bar, a large heading reads "Your Trusted Health Companion". A subtext below the heading states: "Expert health guidance and wellness support, available whenever you need it most." A button labeled "Explore Resources →" is visible. The main content area features two cards. The left card, under the "Guidance" category, is titled "Understanding Common Cold Symptoms and Relief" and includes a snippet about identifying cold symptoms and discovering remedies. It was posted by the "MedAssist AI Health Team" on October 26, 2023. The right card, under the "Wellness Tips" category, is titled "5 Simple Habits for Daily Mental Wellness" and discusses five habits for mental health. It was posted by "Dr. Elena Petrova" on November 15, 2023.

Project description :

MediAssist AI is a smart healthcare assistance system that uses Artificial Intelligence to support users in understanding their health condition. It is designed to help people by analyzing symptoms and providing basic medical guidance. The system is easy to use and interacts with the user through simple questions related to their health.

The user enters symptoms such as headache, fever, cough, weakness, or pain. MediAssist AI analyzes the input and generates possible health issues along with precautionary steps. It also provides first-aid suggestions, medicine reminders, diet plans, and emergency alert notifications when needed. This makes the system helpful in everyday health monitoring.

This AI tool is especially useful for people living in rural or remote areas where hospitals are not easily available. It is also helpful for senior citizens who need regular health tracking and reminders. MediAssist AI promotes early health awareness and guides users to take the right action at the right time.

THANK YOU IBM
